Cybersecurity Staffing Solutions

## Protecting Public Access: Cyber Talent for a Secure Digital Experience

As Pennsylvania expands access to digital services for its residents, cybersecurity has never been more mission-critical. From online portals and case management systems to cloud-based citizen applications, protecting public-facing technology is essential to ensuring trust, continuity, and compliance.

Abel Personnel provides pre-vetted cybersecurity professionals who support public agencies, prime contractors, and regulated industries in safeguarding systems that serve residents every day.

### Key Roles We Recruit For

Security Analysts • SOC Analysts • IAM Professionals • GRC Specialists • Cloud Security Engineers

## Why Cyber Clients Choose Abel Personnel

- Actively sourcing cleared and clearance-eligible cyber professionals (Public Trust, Secret, CI, and Full Scope Polygraph).
- Recruiters trained in NIST, NICE, and CMMC-aligned workforce frameworks.
- Deep familiarity with the requirements of secure environments and federal contracting.
- Diverse, DEI-aligned candidate pipelines across cybersecurity and IT

### Flexible Hiring Models

- > Direct Hire
- > Temp-to-Hire
- > W2-Contract

## Representative Areas of Impact

- > SOC support for digital service agencies with high citizen portal usage
- > GRC staff overseeing compliance across benefit access platforms
- > IAM professionals managing secure access to resident records and case systems
- > Cybersecurity auditors validating controls for statewide public-facing tech
